

'97-'05 Jeep Wrangler / Rubicon

6" and 8" Wrangler TJ Rock Ready® Suspension System Skyjacker® Suspensions now offers Jeep Wrangler TJ owners the ultimate in suspension technology. Skyjacker® re-engineers the TJ's suspension geometry via an integrated sub-frame assembly.

KEY FEATURES

- 80% increase in the length of the lower control arms produce no more than 1.5 degree of caster change.
- Integrated 2 piece sub-frame assembly
- Adjustable flex front & rear track bar
- Double disconnect front sway bar end links & extended rear sway bar end links
- D.O.T. front and rear extended length stainless steel braided brake lines
- Drop pitman arm
- Heavy duty steering stabilizer

Sub-Frame Assembly for Long Arm Systems
Skyjacker's new bolt-on sub-frame is designed for easy installation and allows these Long Arm Systems to really FLEX their muscles.

Options & Accessories

Slip Yoke Eliminator

The Skyjacker® fixed yoke kit replaces the output shaft with a large 32 spline output.

Adjustable Rear Track Bar

Fitted with a pair of .75" two piece Teflon®/Kevlar® self lubricating and sealing rod ends, it aids in centering the rear differential.

CV Drive Shafts

The double Cardan CV drive shafts work in conjunction with our fixed yoke kits.

pg.186

pg.184

pg.186

But Wait... You CAN clear 38's right out of the box. These Rock Ready® Kits are available for TJ's equipped with a stock Dana 30, with an aftermarket Dana 44, or a Ford 9" front differential. Skyjacker® is achieving more articulation, more flex, more travel, more height, more affordable fun and more of what you are looking for in a suspension. If you are going to hit the rocks, you'd better be Rock Ready®.

'97-'05 Jeep Wrangler TJ/Rubicon

4" Rock Ready® Long Arm Suspension System Skyjacker® Suspensions now offers a 4" Long Arm kit for the Jeep Wrangler TJ. It's a new "TWIST" above and beyond other 4" Suspension Systems. These Long Arms reach the maximum articulation available for a 4" lift System. You can run the roads, reach those hard-to-get to off-road places and park on your street with style.

TJ40RRK-DX

Rock Ready® Series The Double Flex Long Arms have spherical rod ends at both ends of the link. These 1.25" Teflon®/Kevlar® lined, self-lubricating and self sealing rod ends are a key part of this System's 'flexibility'.

KEY FEATURES

- D.O.T. certified front and rear stainless steel braided brake lines
- 80% increase in the length of the lower control arms.
- Double disconnect front sway bar end links & extended rear sway bar end links
- Integrated 2 piece sub-frame assembly
- Adjustable flex front track bar
- Optional adjustable flex rear track bar
- Drop pitman arm
- Heavy-duty steering stabilizer
- Transfer case shifter bracket
- Front and rear Softride® coil springs

Options & Accessories

Tie Rod Tubes

Skyjacker® replaces the original tie rod tube with a 1.25" OD x .25" wall thickness DOM tubing that is swedged down on each end to original specs and fitted with new retaining clamps.

pg.183

pg.187

Coil Spring Isolators

These coil spring isolators can be added to your lift kit to level the TJ front or rear. These are a must for heavy tire carriers and trail ready rigs.

Platinum Series Coil Overs

Skyjacker® takes suspension technology to a new level of performance with the Platinum Series Coil Overs. Order the Platinum Series Coil Over conversion as part of a Skyjacker® lift system or as an upgrade to an already existing kit. Applications include 4", 6", 8" and 9" lifts for the '97 - '04 Jeep TJ.

'97-'05 Jeep Wrangler TJ/Rubicon

2.5" & 4" FLEX Series Systems Standard, Single or Double Flex... this is the question? The Flex Series does just what the name implies... FLEX! Skyjacker's Kits and Systems, offer Standard, Single or Double Flex suspension performance.

FLEX
SERIES
BY SKYJACKER®

FLEX Series Suspension Systems

The Flex Series systems are specifically designed with the "mid-to-extreme" rock crawler in mind. These Flex Kits and Systems have taken the abuse of some of the harshest terrain in the land.

KEY FEATURES

- Front and rear Softride® coil springs
- Upper Standard, Single or Double Flex links
- Lower Standard, Single or Double Flex links
- Double disconnect front sway bar end links (4 inch kits only)
- Adjustable front track bar (4 inch Single Flex and Double Flex Kits only)
- Drop pitman arm (4 inch Kits only)
- Heavy-Duty steering stabilizer (Single and Double Flex Kits only)

The TJ251K (2.5" kit) features Standard Links, a transfer case lowering kit plus front and rear Softride® coil springs and features Standard links that use polyurethane bushings at both the frame and axle ends.

TJ251K

Options & Accessories

Steering Gear Box Skid Plate

This Skid Plate is made of 3/16" steel providing tremendous strength out front and low where you need it. The Skyjacker® steering box skid plate features mounting points at the front bumper, crossmember and outside frame; it has a zinc finish for corrosion resistance.

pg. 186

Steering Stabilizers

Skyjacker® offers steering stabilizers for virtually every 4x4. These stabilizers are available in heavy-duty replacement, single, dual and triple kits.

pg. 163

KEY FEATURES

- Front and rear Softride® coil springs
- Upper Standard, Single or Double Flex links
- Lower Standard, Single or Double Flex links

'97-'05 Jeep Wrangler TJ/Rubicon

2.5", 4" and 6" VALUE FLEX Series Systems 2.5", 4" and 6" VALUE FLEX Series Systems are just what you need to satisfy your appetite for off-road excitement... and Skyjacker® has it for you. Introducing the Value Flex Series. The Systems in this series achieve all of what you're hungry for in a suspension - the Lift, the Look and the Performance - all at the Right Price. Skyjacker® will fill your plate with a hearty portion of performance parts and you can add the excitement.

VALUE FLEX Series Systems

The Value Flex Series Systems offer HUGE articulation at a huge savings. Skyjacker® gives you the performance of the Flex Series with the economic features of the Standard Series. This flavorful package is served up with Single Flex lower control arms fitted with massive 1.25" Teflon®/Kevlar® self-lubricating and self-sealing rod ends at one end with poly bushings at the other... with a lot of extras.

KEY FEATURES

- Lower control arms fitted with 1.25" Teflon®/Kevlar® self lubricating and self sealing rod ends at the axle
- Greasable polyurethane bushings at the frame to soak up the energy of the road
- Steering box skid plate
- Tie rod boots
- Sway bar disconnects

Sub-Frame Assembly for Long Arm Systems
Skyjacker's new bolt-on sub-frame is designed for easy installation and allows these Long Arm Systems to really FLEX their muscles.

Options & Accessories

Adjustable Rear Sway Bar

Skyjacker® offers an adjustable rear sway bar with multiple mounting points. Made of 4140H steel alloy with a larger-than-stock diameter.

High Clearance Skid Plate

This Skid Plate will fit your stock or lifted '97-'05 Jeep® TJ. The Skid Plate is made from 3/16" steel with formed and gusseted corners.

Platinum Series Coil Overs

Order the Platinum Series Coil Over conversion as part of a Skyjacker® lift system or as an upgrade to an already existing kit.

'97-'05 Jeep Wrangler STOCK OPTIONS

Skyjacker® Performance O.E. Replacement Parts for the 1997-2005 Jeep® TJ The Wrangler TJ is a very capable off-road vehicle in its original condition. Depending on your needs and driving conditions, a lift may not be necessary. Skyjacker® is excited to release a new line of Performance O.E. Replacement Parts geared toward the factory height TJ.

PLATINUM Series MonoTube Gas Shocks

The Platinum MonoTube Series Gas Shocks are exactly designed to handle the harshest off-road conditions, but still deliver performance on the highway with comfort and stability.

pg.150

#JLL01

Front & Rear O.E. Replacement Lower Control Arms/Links

The Skyjacker® lower control arms are a direct replacement for the front and/or rear factory units. Built from .250" wall tubing, these heavy-duty lower control arms feature long lasting, greaseable polyurethane bushings at each end. If you want to increase your rock readiness, these aggressive, durable links should be first on your request list.

Steering Gear Box Skid Plate

This Skid Plate is made of 3/16" steel providing tremendous strength out front and low where you need it. The Skyjacker® steering box skid plate features mounting points at the front bumper, crossmember and outside frame; it has a zinc finish for corrosion resistance.

pg.183

pg.186

Tie Rod Tubes

Skyjacker® replaces the original tie rod tube with a 1.25" OD x .25" wall thickness DOM tubing that is swaged down on each end to original specs and fitted with new retaining clamps.

Steering Stabilizers

Skyjacker® offers steering stabilizers for virtually every 4x4. So why not a stock TJ?

pg.163

Adjustable Rear Sway Bar

Skyjacker® offers an adjustable rear sway bar with multiple mounting points. Made of 4140H steel alloy with a larger-than-stock diameter.

'87-'96 Jeep Wrangler YJ

6" Rock Ready® MonoLinear System The latest in off-road leaf spring technology is Skyjacker's Rock Ready® MonoLinear System. It has a Single Leaf spring that is technologically advanced and engineered to give the maximum articulation, maximum tire clearance and maximum durability.

Softride® YJ Style Softride® technology produces the highest quality of leaf spring systems the industry has ever known. With Skyjacker's Softride® technology you can take your classic ride to a new level of performance and value while reaping the benefits of a Softride®.

SOFTTRIDE
BY SKYJACKER®

KEY FEATURES

- Four monolinear springs
- Front extended, greasable tow bar shackles
- Rear extended, greasable boomerang shackles
- Extended front track bar
- Double disconnect extended sway bar end links
- Drop pitman arm
- D.O.T. certified stainless steel brake lines

Options & Accessories

YJ 5th Link Traction Bar

Increase the Traction and Keep the Articulation in your 1987-96 Jeep YJ Wrangler. Skyjacker's NEW 5th Link Traction Bar is the fix for unwanted suspension movement that cause axle-wrap. Axle-wrap relates to unwanted rear pinion changes that causes drivelines to bind-up, driveshafts to buckle, suspension damage and yokes to break.

This innovative design keeps your ground clearance much higher... there's nothing that hangs down. There is no binding and no restrictions of movement where you want it. The adjustment in the rod end also allows you to 'fine tune' the desired position of the traction bar.

This Skyjacker® exclusive drastically eliminates wheel hop and applies the torque where you want it... Adjustable for most lift heights, the 5th Link is a must for spring-over applications.

'87-'96 Jeep Wrangler YJ

2.5" and 4" Military Wrap You will want to utilize the performance of the Double Military Wrap Leaf Springs to gain torque control, main leaf protection and exceptional ride quality. These durable, long lasting units have larger spring eyes at both ends. These larger eyes contain larger bushings - bigger bushings... more bushing in the springs and on the mounting surface. They are designed for strength & longevity.

KEY FEATURES

- Four military wrap springs
- Added torque control
- Main leaf protection
- 2.5" **Spring Over or Under** & 4" Spring Under System applications are available

MILITARY WRAP SPRINGS

Options & Accessories

Slip Yoke Eliminator

The Skyjacker® fixed yoke kit replaces the output shaft with a large 32 spline output.

Transfer Case Lowering Kit

Kit allows the enthusiast to gain height without sacrificing the drive shaft. These kits are simple to install and eliminate vibration and drivetrain angle problems.

CV Drive Shafts

The double Cardan CV drive shafts work in conjunction with our fixed yoke kits.

'87-'96 Jeep Wrangler YJ

2" and 4" Systems These versatile Systems consist of front and rear Softride® multi-leaf springs and e-coated u-bolts. The 4" features rear track bar brackets. The 2" and 4" systems are the perfect lifts for the less extreme off road driver. Complete your YJ today by ordering one of these versatile systems.

KEY FEATURES

- Four Softride® multi-leaf springs
- Front and rear e-coated u-bolts
- Front and rear track bar brackets (4" only)

'55-'86 Jeep CJ

2" & 4" Systems for the '76 - '86 Jeep CJ Many CJ owners will say the CJ is the only Jeep. Well Skyjacker® has designed the BEST rated springs for these true believers. These Softride® first-rate systems are the perfect way to transform your daily driver into the Conquering Jeep (CJ) you need it to be.

Softride® Technology Softride® Technology enhances every single aspect of leaf spring performance, giving you all the vigorous off-road handling needed while providing the smooth street riding characteristics that you demand. Skyjacker's advanced method of shot-peening, tapered leaves, Teflon® wear pads and 'presetting' process achieves articulation at its best without sacrificing the life of the spring.

KEY FEATURES

- Front and rear Softride® multi-leaf springs
- Long lasting red polyurethane bushings
- Front and rear e-coated u-bolts

Noted Accessories Skyjacker® also has a long list of readily available accessories to take your '55-'75 CJ to an even greater level of performance.

- Hydro or Nitro Shocks
- Platinum Series Gas Shocks
- Drop pitman arm (required for 4" lift)
- Front double disconnect sway bar end links
- Extended D.O.T certified and T.U.V. approved stainless steel braided brake lines
- Tubular transfer case lowering kit
- Bump stop spacers

Options & Accessories

Tie Rod Tubes

Skyjacker® replaces the original tie rod tube with a 1.25" OD x .25" wall thickness DOM tubing that is swaged down on each end to original specs and fitted with new retaining clamps.

Polyurethane Cab Mount Bushings

A wise addition when installing a body lift. These poly bushings replace the stock rubber bushing that wear out over time.

Steering and Pitman Arms

Skyjacker® manufactures a wide array of steering correction components and pitman arms available for many applications.

Steering Stabilizers

Skyjacker® offers steering stabilizers for virtually every 4x4. These stabilizers are available in Heavy-Duty replacement, single, dual and triple kits.

'02-'04 Jeep Liberty KJ

2.5" System For The '02-'04 Jeep Liberty Go off-roading & 4 wheelin' with Skyjacker's patent pending 2.5" PLATINUM Series Linear Scoil setup.

KEY FEATURES

- Rack-and Pinion Steering Assembly Left in OE Position
- No Replacement or Modifications Needed to the Drive Shafts
- PLATINUM Series Linear Scoils
- Massive 2" Piston Bore
- 7/8" Chrome Hardened Piston Shaft
- Off-Road Race Inspired Wafer Valving
- 1/8" Heavy-Gauged Steel Body Wall
- Billet Aluminum Coil Seats
- Preset Softride® Front Coils

PLATINUM Series Linear Scoil Skyjacker® gives your Liberty additional freedom to go farther off the beaten path with this patent pending 2.5" PLATINUM Series Linear Scoil System. This setup replaces the ample strut with a higher quality shock & Softride® coil in the front along with full-height Softride® coils in the rear. This is a surprisingly simple yet completely durable suspension package. It allows the rack-and-pinion steering and front & rear sway bars to be left in stock position for precise steering response. There is also no need to modify or replace the drive shafts and it allows for larger 30" tires.

Options & Accessories

Skyjacker® Shock Options

Skyjacker offers three different shocks options for you to choose from. Choose your performance level: Hydro, Nitro or Platinum Biggas Series

- Rear Bump Stop Spacers

'93-'98 Jeep Grand Cherokee

3" Grand Cherokee Flex Series Systems With Skyjacker's 3" system, you can have a Standard, Single or Double Flex in your suspension package. Three options are available with the design of the upper and lower links.

Flexy Designs The Standard system features polyurethane bushings at both ends of the links. The Single Flex utilizes a polyurethane bushing at the axle end and a Teflon®/Kevlar® self lubricating and self sealing spherical rod end at the frame. The Double Flex features the same Teflon®/Kevlar® spherical rod ends at both the axle and frame ends of the link, producing the most articulation of these three systems. The Flex Series® suspension kit for the Grand Cherokee ZJ includes the Softride® engineered front and rear coils, the adjustable front track bar, a heavy-duty steering stabilizer and double quick disconnect sway bar links. All of these quality components will do more than just enhance your Grand Cherokee's ride qualities. The Flex Series® will create a radical departure from all the stock Grands on the block.
